(a) Due to the lack of standardised maturity scales, Belgium did not collect maturity data on surveys and in the market sampling programme until 2011. Belgium starts collecting maturity data on surveys in 2012, following the outcome of relevant maturity staging workshops organised in 2010-2012 (WKMSSPDF 1 & 2, WKMSTB).

(b) Belgium has no surveys in the North Atlantic. Therefore, indicators 1-4 can not be delivered for this region (also no maturity staging on the market for this region).
